

M21-G2 Universal Bracket Kit

GTSOLM21-G2-UVBR

25W - 55W

Commonly Replaces
50W-175W HPS/MH/HID

Description:

The universal bracket retrofit kit facilitates the simple retrofit of a shoe box fixture. This system was designed specifically for states that do not qualify screw in yokes for a rebate, because of the rigidity issues over time. With time a screw in yoke can on occasion wobble loose out of the medium or mogul bases due to roadway vibrations. It is a versatile mounting system with x, y, and z axis maneuverability. This allows for tilting, rotating, and sliding of the Engine to achieve exactly the result desired.
